It takes clean filters to keep the air and water in your house clean. Here are 12 filters you should change, with advice from the product experts at Consumer Reports.

12 Filters You Should be Changing at Home - Consumer Reports

Flow Rate. The flow rate represents how much water runs at your tap in a certain amount of time and is measured in gallons per minute. Although some people are worried about the fact the water runs through a series of filters, you must know that the flow rate should not be altered by the water filter.
