I talked to my local expert about the DT530. He has mostly retired for wrenching in a Navistar dealer and equipment but still goes in for Road Ranger repairs on call. He says the crank and block are different and heavier duty in the DT530. All electronic engine, with fantastic computer aided diagnostics available at most dealers.

I found that I could hear the precycle of the auctuator but no bounce once the key was turned off as I could on the good engine. I stoped there knowing that with only 25,000 miles they are probably going to want to take it in for warranty. Is this a common problem on the new DT's, seems like I've seen an awful lot of new actuators on these trucks?
