Abstract: Turbochargers are centrifugal compressors driven by an exhaust gas turbine and employed in engines to boost the charge air pressure. Turbocharger performance influences all important engine parameters, such as fuel economy, power, and emissions. It is important to understand a number of fundamental concepts before moving on to a more detailed discussion of turbocharger specifics.

A jet engine is a type of reaction engine discharging a fast-moving jet that generates thrust by jet propulsion. This broad definition includes airbreathing jet engines (turbojets, turbofans, ramjets, and pulse jets). [clarification needed] In general, jet engines are combustion engines. Common parlance applies the term jet engine only to various airbreathing jet engines.

### **Jet engine - Wikipedia**

Based upon the experiences and knowledge gained from the British Railways and English Electric Type 4 diesel-electric locomotives that were built as part of the Government's 1955 Modernisation programme, Brush were keen to develop a new design of locomotive which would, they hoped, be the precursor to a large class of diesel-electric locomotives, designed and built to be both lighter and more ...

Carb kits or carburetor rebuild kits are among the most frequently purchased outboard maintenance parts. New gaskets, O-rings, and fuel inlet needles and seats are often required to return a poorly performing motor to good working order. Some carb kits contain floats and some don't. The main carb jets are not in all kits, either, so it's a good idea to look at a complete engine diagram to see ...

The South African Railways Class 25NC 4-8-4 of 1953 was a steam locomotive.. Between 1953 and 1955, the South African Railways placed fifty Class 25NC steam locomotives with a 4-8-4 Northern type wheel arrangement in service. The Class 25NC was the non-condensing version of the Class 25 condensing locomotive, of which ninety were placed in service at the same time.
