A lubricant is a substance, usually organic, introduced to reduce friction between surfaces in mutual

contact, which ultimately reduces the heat generated when the surfaces move. It may also have the function of transmitting forces, transporting foreign particles, or heating or cooling the surfaces. The property of reducing friction is known as lubricity.

Introduction. The cooling system - deceptively simple yet devilishly complicated. Like many things - your rig's cooling systems is one of those things that seems simple, that most people think they understand, but which, behind the scenes, is actually a lot of fairly complicated stuff working together in a fine balance.
