The lecture notes correspond to the course “Linear Algebra and Differential Equations” taught to sophomore students at UC Berkeley. We accept the currently acting syllabus as an outer constraint and borrow from the official textbooks two examples, 1 but otherwise we stay rather far from conventional routes.

I think that Linear Algebra is more preferable than Differential Equation. The problem I have with DE is that all you get is a toolkit for solving the equations. If the problem you get is not the types you have learnt to solve, you just can't solve it.
