Cryptography lives at an intersection of math, programming, and computer science. This subreddit is intended for links and discussions surrounding the theory and practice of modern and strong cryptography. Please note that this is a technical subreddit, not a political one! The focus is on the algorithms and the security of the implementations.

**Cryptography: Theory and Practice, Fourth Edition: Douglas ...**

Douglas Stinson's book Cryptography: Theory and Practice has walked that line well for more than a decade. It might not be as practical as some programmers would like or as rigorously theoretical as some mathematicians would like, but for most people who are between those two extremes this book does an excellent job.
