I have a 2008 450 isx cummins with 612000 miles. I keep getting engine fault code for crankcase pressure. when i change the filter it doesnt have much oil on it but the code will go away for about two days then it comes back when i have a load. after about a month i will get the red engine light to ... - Cummins ISX crankcase filter

### **What causes constant crankcase pressure code? - Cummins ...**

When I called Good Sam, they put me in touch with a Cummins person that could come and check the codes. He told me there are only two reasons for a stop engine light. Cooling level, or oil pressure. There were two oil pressure sensors on mine, one for the stop engine light, and one for the gauge. The light sensor had failed.

From irrigation systems and sprayers to combines, harvesters and more, there's a Cummins engine perfectly suited to help you get the job done, even in the most challenging environments. You'll find Cummins agricultural engines hard at work across the globe: in U.S. hayfields, South American nut orchards, Asian vegetable farms and beyond.

### **Diesel and Natural Gas Engines | Cummins Inc.**

If the stop engine light stays on for a length of time the ECM will go into protect mode and de-rate engine power, to allow the driver a warning time to get the coach off the road before engine shut down. That being said , if you have never got to the de-rate stage , the stop engine warning could very well be false.
