My Cub Cadet 2165 died suddenly. Before it stopped running, I smelled a super glue like smell. I thought for sure it was something in my ignition switch that I have now replaced. Now when I try to start it, it tries to turn very briefly and you can hear a squeaking noise. The starter and solenoid also get hot.

I have a '98 Cub Cadet 2165, that the engine has pretty much gone to the dogs (burns nearly 1/2 qt per mowing, own stock in spark plug company). I aquired a 670 Predator engine, and was wondering if anyone else has done something like this? If so, what is needed to fit the driveshaft to the engine, and how to make an exhaust fit? Any help would be greatly appreciated.
