How to Make Your Own Decal Setting Solution By Vincent Labbate ; Updated April 12, 2017. Setting a decal on an object can be frustrating when it does not set in the correct position. Peeling off the decal after it is stuck in place can pull the finish off of the object or rip the decal. Luckily, there is a very simple way to control the decal ...

I'm sure someone will correct me if I'm wrong, but I think it's the decal Wetting solution that smells strongly of vinegar. To my nose, the setting solution smells faintly of lacquer something, but not sure. Maybe I'm mixing up my decal application steps. Are you asking about the stuff used to make decals bond better, or conform better?

### **decal setting solution at home - HobbyTalk**

I read somewhere, I think it was on this forum, that the strongest setting solution you can use is plain vinegar. It is reported to make decals melt better than any of the brand-name solutions. If you want to try it, I'd use some scrap decals and dilute it with some water and see how things work.

### **Homemade decal set?? - FineScale Modeler - Essential ...**

A correction on the Micro set dilution proportions. 1 part vinegar to 8 parts water should do the trick. 50/50 would probably still be too harsh. Also, Tamiya, Testors, Humbrol, Vallejo, and several smaller hobby companies all offer some sort of decal setting solution. I believe Tamiya's is called Mark Fit.

### **Alternatives to decal setter and softer? : Gunpla**

recently i purchased a bottle of Testors "decal setting solution", but i'm unsure whether to apply it on the surface before applying decals, or after? Another question for me is if these decal sets allow corrections e.g. putting decal into the panel line with toothpick, or will this ruin the decal?

### **Decal setting solution? - FineScale Modeler - Essential ...**

The final option is Klear - I tried it as a decal setting solution many years ago after reading about it in a magazine and sure enough it does work on just about every type of decal, but it won't make them conform to really complex compound curves or lumps and bumps. I used to use Klear on the really horrible decals from older Revell kits - you ...

### **How To Apply Decals with Solutions**

I Suggest using luke warm water as hot water activates the paper too quickly and can make the decals hard to handle. I prefer using Walthers Solvaset for a setting solution although any commercial decal set will work. Because of the characteristics of the ink itself it will not shrink down over details as well as Silk Screened decals.

### **Decal solvents - What's the best, and why?**

Ever want to try decal softener on your wonderful waterslide decals, but just can't afford any (it can be damned expensive if you can only get the high end stuff), or you don't wanna wait for steve to ground ship it across the border...there is a solution ( no pun intended) !!! I bought some of that "Testors" Decal softener (most model building people should know what I'm talkin' about), and ...

### **DIY decal softener!**

Special Solvent Makes Decals "Snuggle Down" Solvaset's extra-strength formula readily dissolves decal film . . . makes decals conform to surface irregularities and eliminates ugly air pockets that can get trapped under the film. Apply with the included brush-cap and let dry. Can be diluted with water for use on delicate decals.
