Fundamentals of Cost Accounting - mheducation.com

The net operating income under absorption costing is \$20,000 more than the net operating income under variable costing. When production is more than sales (as in this exercise), the fixed manufacturing overhead is deferred in inventory that causes a higher net operating income under absorption costing than under variable costing.

Exercise-5 (Variable and absorption costing income ...

Backflush accounting is a certain type of "postproduction issuing", it is a product costing approach, used in a Just-In-Time (JIT) operating environment, in which costing is delayed until goods are finished. Backflush accounting delays the recording of costs until after the events have taken place, then standard costs are used to work backwards to 'flush' out the manufacturing costs.

Backflush accounting - Wikipedia
