i did an engine swap on my 1998 honda civic ex. both engines were d16y8 the one going into the

car was a manual and the one coming out was an automatic. now i assybled everything car is running but the idle is hanging at 2500rpm. i am somewhat aware of the difference in the manifolds, but would that cause this issue?? all sensors plugged and are in working order, no check engine light, but i ...
