Does anyone know what or how I can troubleshoot further? We don't have a service manual for this machine and none of us have been around Deutz's much, other than me with irrigation engines and that isn't all that much. I'd hate to tear stuff down because its probably something totally stupid we're missing.

I have a small piece of plant that has a 2 cylinder oil cooled deutz engine in it. The problem is when it starts up it smokes quite bad but it does clear a bit when it heats up then on idle for a bit and back on to operating speed there is a plume of black smoke. Just asking if anyone has had this before and if it's worth trying to repair or best to get rid ?
