What makes a design “classic”? That it stands the test of time through continued use, critical recognition and popular approval? Or is it simply that its vision and innovation results in it ...

Sublime design: the London Underground map

Common refrigerants and their Ozone Depletion Potential (ODP) and Global Warming Potential (GWP) are indicated below. Ozone Depletion Potential (ODP) of a chemical compound is the relative amount of degradation it can cause to the ozone layer. Global Warming Potential (GWP) is a measure of how much a given mass of a gas contributes to global warming.
