This is an easy-to-build dust separator with a baffle based on J. Phil Thien's well-known "cyclone" design. It works because the incoming air is forced around the outside wall, where the heavier dust and chips fall through a slot in the baffle, into the large trash can below.

Build a See-Through Cyclone Dust Separator for Your Shop ...

Design and development. First run in 1937,, near the time that the competing, larger displacement (at 54.9 litres), 18-cylinder Wright Duplex Cyclone twin-row radial engine's development had been started in May of that year with its own first flight in 1941, the 46-litre displacement R-2800 was the United States's first-flown 18-cylinder radial engine design by 1940.

Pratt & Whitney R-2800 Double Wasp - Wikipedia

In 1935 Wright decided to follow P&W's lead, and started to develop much larger engines based on the mechanics of the Cyclone. The result were two designs with a somewhat shorter stroke, a 14-cylinder design that would evolve into the Wright R-2600, and a much larger 18-cylinder design that became the R-3350.
