Root locus design is almost identical for analog systems in the s-domain and digital systems in the z-domain. The topic is covered much more extensively in classical control texts and inadequately in digital control texts. The digital control student is expected to recall this material or rely on other sources.

If both the switches S1 and S2 are ON, then there is short circuit formed across the combination of LED and resistor. So, the entire current flows through short circuit and no current flows through the LED. Hence, the LED is OFF. Therefore, the logic level that must be output to turn on the LED is S1 is ON and S2 is OFF.
