An aluminum version is supposedly in production now, promising improved thermal behavior and lower weight. The first 4 Zetec pictures are courtesy of Steve K's engine collection for his Birkin - thanks Steve. Pictures of the Crossflow are from my car, while I converted it from the 1600 /110BHP to the 1700 /150BHP spec .

Ford CrossFlow and Zetec engines - my.voyager.net

Crossflow. The Crossflow featured a change in combustion chamber design, using a Heron type combustion chamber in the top of the piston rather than in the head. The head itself was flat with each engine capacity (1098 cc and 1298 cc) featuring different pistons with different sized bowls in 681F and 701M blocks.
