### **Top 12 Best Serious Compact Digital Cameras 2019**

Before there was autofocus, there was focus. The camera is a light-tight box that is used to expose a photosensitive surface (film or digital sensor) to light. In order to focus the light onto the surface, most cameras (and your own eyes) use a lens to direct the light. Why did I say, "Most?" Well, there are many types of cameras around that do not rely on lenses to focus
