In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense "related". The objects correspond to mathematical abstractions called vertices (also called nodes or points) and each of the related pairs of vertices is called an edge (also called link or line).

Some graphs occur frequently enough in graph theory that they deserve special mention. One such graph is the complete graph on n vertices, often denoted by K_n . This graph consists of n vertices, with each vertex connected to every other vertex, and every pair of vertices joined by exactly one edge.
