I run a 2010 VNL780 D 13 and keep loosing prime anytime the engine was shut down, replaced fuel filter housing because the prime pump was shot. and that still did not solve the issue. Pulled the injectors and all of them only had the top O ring in place. I replaced the injector cups and installed new O rings top & bottom on the injectors.

I am not a volvo mechanic but it sounds like a fuel pressure problem. If the lift pump or fuel pump sticks while running then the engine might consume the fuel left over in the secondary filter then die out. By priming the system with the lever on the pump you might be unsticking the pump for the time being.

The Volvo D13 SCR solution delivers a highly efficient engine that provides increased fuel efficiency and low particulate emissions. To combat the resultant NOx emissions, the Volvo system injects Diesel Exhaust Fluid (DEF) downstream from the DPF. The exhaust gas combines with the DEF, which turns the NOx into harmless nitrogen gas and water ...

Perhaps as Doug #2 mentioned it could be a problem with the fuel pump. That is something I will check but when I asked the Dealer Tech who as Tomas pointed out is a mechanic with a very good reputation, he said that if it were an injector or fuel pump issue the engine would be much more impaired and run much rougher. ...
