Hi, :) I'm new to programming and I'm using the Java How To Program Fourth Edition from Deitel and Deitel as my text. I've run into a problem with Exercise 2.16 Where I'm asked: "Write an application that asks the user to enter two numbers, obtains the numbers from the user and prints the sum, product, difference, and quotient of the numbers."

The exercise itself does not really explain what you are supposed to do with that variable. I find Deitel's text to be better than the Daniel Liang text, which I believe is written for those already familiar with the subject matter. I already have bought their visual c# text, and will begin looking into that text once I finish up on the java text.
