scrap palmer's book has some good photos of wire routing. all of the clips are available, your bike should use 4 if i remember correctly. one next to the battery, one on the seat post tube, one on the steering neck and one on the left front down tube. the old dude has them in park or cad.

Wiring harness routing - The Panhead & Flathead Site

I always put my heads on last after the motor is in the frame so I guess the rear should come off with motor in the frame. And I never have used a torque wrench to put the head bolts on either.I just put them all on snug first and tighten them back to front as much by hand as I can with a head bolt wrench and never had a problem.The secret is using good head gaskets.I always use james head ...
