Global Data Management Inc. | Redefine Technology

Concept. The concept of data management arose in the 1980s as technology moved from sequential processing (first cards, then tape) to random access storage. Since it was now possible to store a discreet fact and quickly access it using random access disk technology, those suggesting that data management was more important than business process management used arguments such as "a customer's ...

As a result, database professionals are faced with new challenges and opportunities.

Database Management News, Trends, Analysis
An ideal database architecture would support multiple data models, languages, processing paradigms and storage formats within the one system. Application requirements that dictate a specific database feature should be resolved as configuration options or pluggable features within a single database management system, not as choices between disparate database architectures.
