This traditional text is intended for mainstream one- or two-semester differential equations courses taken by undergraduates majoring in engineering, mathematics, and the sciences. Written by two of the world's leading authorities on differential equations, Simmons/Krantz provides a cogent and accessible introduction to ordinary differential equations written in classical style.

I'm studying differential equations (specifically Laplace Transforms) right now with my college assigned 'Differential Equations with Application and Historical Notes'-George F Simmons. While I like the text, I'm not a big fan of the fact that there are not many solved examples and a solution manual isn't available.

An Introduction to Differential Equations - Rice University
Elementary Differential Equations with Boundary Value Problems is written for students in science, en-gineering,and mathematics whohave completed calculus throughpartialdifferentiation. Ifyoursyllabus includes Chapter 10 (Linear Systems of Differential Equations), your students should have some prepa-ration inlinear algebra.

ELEMENTARY DIFFERENTIAL EQUATIONS - Trinity University
Solution of First Order Linear Differential Equations Linear and non-linear differential equations A differential equation is a linear differential equation if it is expressible in the form Thus, if a differential equation when expressed in the form of a polynomial involves the derivatives and dependent variable in the first power and there are no product [...]
